

Thanya Mysore Santhosh

857-339-8544 | msthanya8@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Northeastern University
Master of Science in Data Science

Sep. 2024 – Apr. 2026
Boston, MA

Vidyavardhaka College of Engineering
B. Tech, Computer Science & Engineering

Aug. 2019 – Jul. 2023
Mysuru, India

PUBLICATION

NU_DeepHealthNLP at #SMM4H-HeaRD 2026: *Entity-Conditioned Generation and a Four-Stage Pipeline for Automated SOAP Note Generation.* ACL 2026 Workshop. 1st place, SMM4H-HeaRD 2026.

TECHNICAL SKILLS

Languages & ML Frameworks: Python, SQL, JavaScript, TypeScript, PyTorch, Hugging Face, Scikit-learn, XGBoost

Generative AI & Agentic Systems: Mistral, BioMistral, LLaMA, Gemini, OpenRouter, Retell AI, QLoRA, vLLM, Voice AI, RAG, GraphRAG, LangGraph, MCP, A2A, FAISS, Neo4j, multi-agent orchestration

Applications, Data & Cloud: React, Express, FastAPI, Flask, Streamlit, PostgreSQL, MongoDB, BigQuery, Snowflake, GCP, Vertex AI

MLOps, Testing & Analysis: Docker, Kubernetes, GitHub Actions, CI/CD, pytest, SHAP, BERTopic, GLiNER

EXPERIENCE

AI Developer Intern, Saturn Tech

Jul. 2026 – Present

- Contribute to a **multi-tenant AI recruitment platform** supporting candidate, job, pipeline, and AI-enabled recruitment workflows
- Develop and validate **LLM-powered candidate screening** and **voice AI interview workflows** across automated recruitment stages
- Test and debug end-to-end AI workflows across frontend, backend APIs, integrations, and asynchronous processing to validate **reliable application behavior**

Research Assistant, Clinical NLP, Northeastern University

Jan. 2026 – Apr. 2026

- Fine-tuned **Mistral-7B** with **QLoRA** and built a **four-stage clinical generation pipeline** across 8,529 training dialogues, incorporating entity conditioning, retrieval, prompting, and verification
- Ranked **1st place** at **SMM4H-HeaRD 2026** and published findings in the **ACL 2026 workshop proceedings**

Data Science Intern, 66degrees

Jul. 2023 – Feb. 2024

- Built customer analytics workflows across Python, SQL, BigQuery, Snowflake, and GCP, **reducing analysis time by 25%** and **improving campaign targeting by 20%**
- Applied **customer segmentation**, **churn modeling**, and **SHAP-based explainability** to identify behavioral patterns supporting targeted retention strategies

PROJECTS

Enterprise Knowledge Orchestrator

[GitHub](#)

- Built a **multi-agent knowledge orchestration system** using **GraphRAG**, **Neo4j**, and **Gemini** via **Vertex AI**, coordinated through MCP and A2A protocols
- Integrated **PII detection** and **full audit logging** to support enterprise-safe, traceable AI outputs

Screen Agent: Vision-Grounded UI Automation

[GitHub](#)

- Built a **computer-use agent** implementing a **perceive-plan-act loop** over a synthetic multi-screen environment, with a Streamlit dashboard and CLI benchmark runner
- Measured **task success rate** and **per-step action-grounding accuracy** using automated tests built with pytest and GitHub Actions CI, covering state transitions and reproducibility

BreastCare: Clinical Decision Support

[GitHub](#)

- Developed **CoxPH survival models** on 2,509 METABRIC patients for overall and relapse-free survival, achieving held-out **C-indices** of **0.625** and **0.609** within a three-model clinical decision-support platform
- Contributed to a three-model clinical ML platform spanning diagnosis, risk stratification, and survival analysis, with project-level results of **98.8% diagnosis accuracy**, **1.000 ROC-AUC**, and **90.9% three-class risk accuracy**
